SUMMARY

Information Technology undergraduate focused on **Software Engineering, Full-Stack Development, and AI Engineering**, with strong foundations in Data Structures, Algorithms, Object-Oriented Programming, Database Management Systems, and Operating Systems. Experienced in building and deploying full-stack and AI-powered applications using **Python, FastAPI, React.js, Node.js, Express.js, MongoDB, REST APIs, LLMs, and MCP**. Strong problem-solving skills with hands-on experience developing scalable applications, integrating third-party services, and designing modular backend systems.

PROJECTS

- **AEVRIX – AI Agent** | Python | FastAPI | LLM APIs | MCP | GitHub

Designed and developed **AEVRIX**, an AI agent that understands user requests, reasons over tasks, and executes actions through integrated AI tools and external services.

Built a modular backend using **Python and FastAPI** with **MCP-based tool integration**, enabling scalable API communication, external service connectivity, and intelligent tool execution.

Implemented **LLM integration, tool calling, prompt engineering, and multi-step task orchestration** to automate workflows and deliver an interactive AI assistant experience.

- **AI-Powered Exam Preparation Platform** | React.js | Node.js | Live Demo | GitHub

Designed and developed a full-stack AI-powered examination platform enabling personalized study plans, quizzes, and learning recommendations using React.js, Node.js, Express.js, and REST APIs.

Implemented secure backend APIs, efficient data flow, and reusable React components to improve application scalability and maintainability.

Integrated AI APIs for automated content generation while optimizing application performance and user experience across devices.

- **Gym Management CRM System** | MERN Stack | Live Demo | GitHub

Built a full-stack Gym CRM system to manage members, trainers, memberships, attendance, and payments using React.js, Node.js, Express.js, and MongoDB.

Designed RESTful APIs, JWT-based authentication, CRUD operations, and scalable MongoDB schemas for efficient business management.

Implemented responsive dashboards, reusable components, and optimized data management to improve usability and application performance.

TECHNICAL SKILLS

Languages: C++, Python, JavaScript (ES6+), SQL

Core CS: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks

Frontend: React.js, HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express.js, FastAPI, REST APIs, JWT Authentication

Databases: MongoDB, MySQL

AI & Agent Development: LLM APIs, AI Agents, MCP, Tool Calling, Prompt Engineering, OpenAI API

Tools & Deployment: Git, GitHub, Postman, Vercel, Docker

EDUCATION

Parul University

B.Tech in Information Technology & Engineering — CGPA: 7.73/10

Vadodara, Gujarat

2023–2027

AB School

Higher Secondary (Class XII)

2023

ACHIEVEMENTS & CERTIFICATIONS

- Solved **180+ Data Structures and Algorithms** problems on LeetCode, strengthening algorithmic thinking and problem-solving skills.
- Developed and deployed **5+ full-stack web applications** using React.js, Node.js, Express.js, MongoDB, and REST APIs.
- Built responsive and scalable software following reusable component architecture, clean coding practices, and RESTful design principles.
- Completed Kaggle's **Intro to Machine Learning** certification and actively explore AI-powered software development.
